WEB DEVELOPMENT

G.A.Varun
24BCE0479

Project 1: Create a fully functional, professional website using HTML, Bootstrap CSS for responsive design, and JavaScript for interactive features. Integrate all the Moodle tasks you've completed so far into a cohesive 3-page website site with smooth navigation via a dropdown menu. Host the website in Github and submit the link too.

You can submit the pdf file containing coding screenshot

I have attached the following links for your reference:
